LSC106

LSC107

LSC117

All measurements are provided in centimetres.

## USING THIS GUIDE

Garment Comparison (suggested for LSC106 \& LSC107): Lay your garment flat and cross
reference the guide to your existing garment dimensions.
Body Measurement: Take a full chest measurement around your body at the underarms and compare with a full chest measurement from the garment, allowing room for desired fit.
Body measurement (suggested for LSC113): Take a full waist measurement and compare with suggested full waist of garment. Suggestion allows for $20 \%$ ideal elastic stretch. Increase size if required for length.
